**<25MM**

**LOWEST COSTS**  
QUICK INSTALL  
EASY MAINTAINING

# THE BEST SOLUTION FOR **CIRCLE & H** HELIDECK LIGHTING

Frictape Circle & H Netlight is a groundbreaking solution, born from the requests of our customers for a more simple and low cost Circle & H lighting solution. Our innovative, standard-complying approach offers operational flexibility beyond any other system on the market: light modules can be integrated to the landing net (no need to drill holes to the helideck) or fastened to the deck in a more traditional fashion.

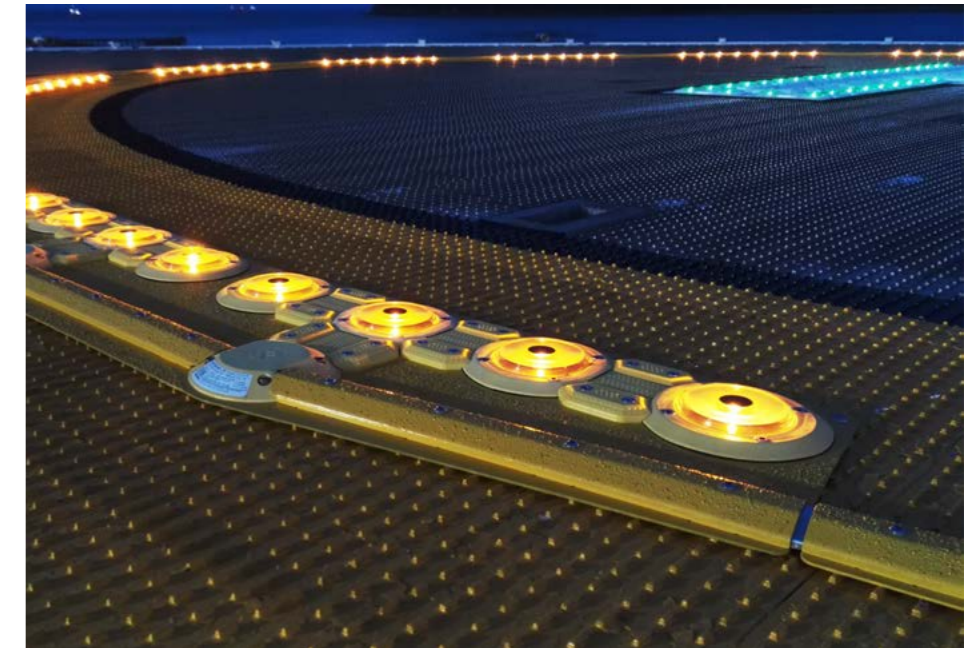

Frictape Classic Netlight

**EASY MAINTAINING**

Frictape Fixed Netlight

## TWO VERSIONS OF NETLIGHT TO CHOOSE FROM - OPTIMIZED SOLUTIONS FOR EVERY NEED

>> Classic Netlight with light modules attached to our landing net does not require any fixed structures for lighting the helideck circle & H. This means that no holes are needed on the helideck for bolts, screws or rivets that could harm the deck's structure. Also installation is remarkably faster compared to fixed solutions.

>> Fixed Netlight has light modules that are fastened directly to the deck with rivets or screws, removing the need for using a landing net. And with our Smart-Covers concept, you can be sure that no screw or bolt heads are visible which could damage the tires of the helicopter. Light modules themselves are identical to Classic Netlight, as are the electrical details of the system.

>> With these two options, Netlight offers the broadest range of choices for Circle & H lighting to meet your needs in different parts of the world.

## LOWEST COSTS IN THE INDUSTRY

>> Frictape Circle & H Netlight provides true value for your investments. Lowest costs in the industry combined with quick installation, modular structure and easy handling lead to concrete savings with predictable investment costs and minimum downtime.

>> Classic Netlight can also be removed if no longer needed and reinstalled elsewhere a unique benefit with great operational value.

>> NEW: for short term needs, Classic Netlight can be also leased! Contact us for details.

## UNCOMPROMISED, STANDARD-COMPLYING SAFETY

>> Frictape Circle & H Netlight consists of custom-designed light modules that are installed either directly to our market-leading Frictape Landing Net (Classic Netlight) or with screws/rivets to the helideck itself (Fixed Netlight).

>> Frictape Circle & H Netlight's uniquely designed, integrated light modules ensure that the Circle & H lights are optimally visible from helicopter, making the helideck location, identification and final approach safe for pilots.

>> Netlight total height is always under 2,5cm, including the lights, baseplate and the landing net. Frictape Circle & H Netlight complies with the CAP437 standard and it has a proven friction coefficient of over 0,65.

>> All our parts are tested to withstand loads generated by the heaviest helicopters.

>> Netlight is fully certified (ATEX, IECEx, IP 66, IP 67, IP 69k, CAA Approvals) and Type Approved by ABS and DNV.

>> Contact our sales team - we'll come up with the best solution for your helideck.
