THE SAFEST **LANDING NET** ON THE MARKET

- ✓ Frictape Landing Net is the market leader for many reasons. It consistently retains its form and tension in all operating conditions and offers a superior service life of five years. Its low-profile and unique non-stretch material, which is developed and manufactured by Frictape – deliver maximum safety for demanding operations, with minimal need for maintenance.
- ✓ Our nets are the only ones with a proven friction coefficient of over 0,65. The low knotless structure – less than 25mm high – ensures safe and effortless walking on the deck. In addition to this, the material is electrostatically safe and non-flammable.

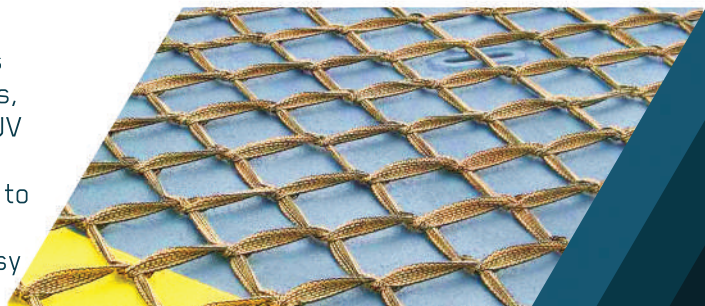

ENSURING SMOOTH OPERATIONS WITH PROVEN QUALITY & LOWEST TOTAL COST OF OWNERSHIP

- ✓ **EFFORTLESS HANDLING IN ALL CONDITIONS**
Frictape Landing Net retains its form in all weather conditions. Its lightweight material enables easy handling, transport, and storage, simplifies helideck cleaning and maintenance. The net's compact packaging is designed to fit through standard vessel doors.
- ✓ **FAST INSTALLATION & EASY MAINTENANCE**
Once a Frictape Landing Net is properly installed, it does not need to be tightened or loosened during normal helideck operations. On top of this, the installation of Frictape Landing Nets is remarkably fast, taking no more than a few hours.
- ✓ **PROVEN QUALITY WITH LOWEST COST OF OWNERSHIP**
The material used in Frictape Landing Nets is a unique blend of manmade and natural fibers, developed by Frictape. The material resists UV radiation and harsh environmental exposure, delivering a market-leading service life of up to five years. Moreover, minimal maintenance, fewer replacements, fast installation and easy handling together ensure a consistently low total cost of ownership.

CERTIFIED AND TESTED QUALITY

- ✓ **CAP 437 COMPLIANCE**
A sliding helicopter can cause a load of over 500kg to a netting. CAP437 standard requires nets to be tensioned to 225kg. Realizing that this is not always enough, our nets have been designed to exceed these standard requirements for the whole lifetime of the nets.
- ✓ **ABS & DNV TYPE APPROVALS**
Our nets also hold both ABS and DNV type approval certificates. Furthermore, our whole manufacturing process and all operations are ISO 9001 certified. As a real-life concrete proof of quality, our landing nets are actively used in over 2000 locations worldwide.

FRICTAPE

FRICTAPE is the world's largest manufacturer of helideck nets. For over 40 years, our focus on high performance aviation safety solutions has resulted in industry-leading safety nets that ensure smooth, safe and cost-effective operations in all conditions. Our helideck safety solutions have been installed at/in more than 2000 locations worldwide.
